SÖKTAŞ

FLAT - WRINKLE FREE is the generic article code for our wrinkle free fabrics. The use of the MXL process is complemented by special finishes which SÖKTAŞ has developed for great handle. Those finishes will remain effective up to 50 washes. These articles have better abrasion performance compared with traditional non-iron fabrics.

FLAT - WRINKLE FREE processes do not contain ammonia and are environmentally friendly.

BETTER ABRASION PERFORMANCE

Shirts made up with ammonia treated fabrics suffer from multiple abrasions especially on collars and cuffs. MXL processed Flat - Wrinkle Free fabrics have increased abrasion resistance. Liquid ammonia treatment (2/3 at 15.000 turns), MXL treatment (4 at 15.000 turns)

HYDROPHILICITY

Hydrophilicity of the MXL treated Flat - Wrinkle Free cotton fabrics are twice as better compared with ammonia treated cotton fabrics. Flat - Wrinkle Free fabrics transport moisture rapidly and this supports natural body functions.

HANDLE

SÖKTAŞ uses innovative finishes on Flat - Wrinkle Free which are both attractive and functional.

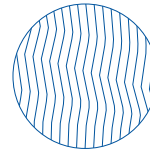

ENVIRONMENTALLY FRIENDLY

The process is environmentally friendly due to non-ammonia usage.

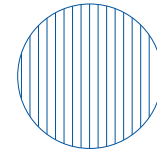

CONTINUOUS PROCESS

New technology allows continuous treatment for reliable process management, control safety and consistency.

REGULAR FINISH

FLAT WRINKLE FREE

After 10 washes
without ironing.

ADVANTAGES

No ironing. Moist cross-linking, MXL process and special finishes developed in SÖKTAŞ for great handle.

Better Abrasion Performance compared to the traditional non-iron fabrics. Better hydrophilicity. Lasts up to 50 washes.
